OUR TEAM

Thomas Coombes
Founder & Creative Director

Nancy Pollard
Senior Interior Designer

Sandra Peers
Interior Designer, Stylist & Brand Manager

Katie Ford
Interior Stylist

Along with our architects, building contractors, electrical, plumbing, carpentry trades & building inspectors, we have a dedicated design team who will work from start to finish managing the exterior & interior finishes, ensuring everything is built and finished to the highest of standards.

Should you wish to discuss an investment opportunity or custom development further, we would love to hear from you!

INTERIOR DESIGN

Based in Esher Surrey, Thomas Coombes focuses on real homes and real families. Each client and their respective space is important and will be treated as such. From the small to the large projects, every step of the way we will maintain quality and integrity in our work.

We love this work. In fact, it doesn't even feel like work. We love partnering with a client to bring their vision to life. We work with the highest caliber of developers, architects, contractors, and suppliers to bring you the best of the best.

Thomas Coombes Interior Design provides accurate floor plans, elevations, 3D visuals, FF&E specifications, and presentation boards of selected materials for you to visualise the design before we bring it to life.

Whether you have a new or existing space, a single room or an entire home to renovate, we will work to suit your needs. We start with an understanding of your vision and the requirements of the space. We incorporate a budget that you feel comfortable with, and create a layout that serves as both innovative and stylish.

We are your partner in the management of the project. From start to finish we will ensure a seamless execution.

Our goal is to have you invested in the process and to achieve a space that leaves an impression.

OUR PROCESS

Concept Design

The first step in all of our projects is a site visit. Thomas Coombes and his team will visit the client's home and discuss ideas, plans, vision and requirements whilst gaining understanding of the potential of the space.

We interpret our client's brief into concept boards and explore spatial planning options whilst also drawing up floor plans and designing the look and feel of each area.

This stage is hugely collaborative and we work closely with the client making amendments and finalising plans.

Detail Design

With all the concepts agreed we move onto the next phase whereby we create a series of CAD plans and specifications.

The computer assisted designs allow the client to see the finishes, joinery, interior architecture and bespoke furniture whilst really getting a feel for what the completed project will be like.

This design pack gives a comprehensive guide to timelines, budget and scope of work.

Installation

Attention to detail is paramount. Our designers attend regular meetings and site visits to ensure the brief is adhered to meticulously and the project is progressing accordingly.

We always keep the client updated throughout the project, delivering finished homes that exceed expectations.
